

Do-It-Yourself Flower Pot Mosaic

STEP BY STEP

- 1 Once you have decided on a design or pattern, apply a coat of glue over the edge of the pot.

- 2 Carefully place the tiles evenly separated from each other. Take your time until the edge is completed. Let the glue dry for a few hours.
- 3 Mix a little bit of water with about a quarter cup of powdered grout. It should be the consistency of thick pancake batter. Make small batches at a time! This may take some trial and error and experimentation.
- 4 Rub the wet grout over the tiles so they fill the spaces in between the them. Grout above and below the edge of the pot too.
- 5 Let the grout dry for twenty minutes. Rub off the grout from the top of the tiles with a sponge.

MATERIALS

Home & Garden Store:

- Terracota Pot
- Powdered Grout
- Plants & Flowers

Art & Craft Store:

- Bag of 3/8" Ceramic Tiles
- Mosaic Adhesive Glue

Supermarket:

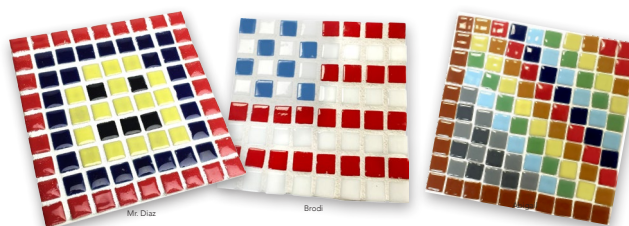

- Sponge & Paper Towels
- Mixing container
- Spoon

Using mosaic glue allows you to start and stop this project & work at your own pace.

MOSAIC COASTERS

Use 4" square bathroom tiles from a home & garden store to create decorative drink coasters.

TIP

Use old ceramic cracked plates to make irregular shaped mosaics!
